

Spinach Hybrid No. 7

Description: The plant has an upright posture and is high yielding. Leaves are semi-savoyed and dark green.

Maturity: Approximately 42-44 days

Comments: It is suitable for fresh market, and processing. It is recommended for fall crops. This variety is fast bolting when spring planted and is machine harvestable for quick freezing and canning.

Spinach Giant Nobel F1 Hybrid

Description: Giant Nobel is a spinach hybrid that offers growers high resistance to downy mildew races 1-10. A high-yielding variety, it produces smooth, round, dark-green and pliable leaves for improved harvest quality. It is well adapted for fresh market and processing use.

Maturity: Approximately 43 days.

Disease Resistance: Pfs 1-7, 9, 11 (HR).

Comments: The plant has an erect posture and has very high yields. Leaves are smooth, large, and dark green. It is suitable for home gardens and processing. This variety is fast growing for fall and winter crops.
